

Amendments to the Specification

Please amend the specification as follows:

Add the following paragraph to page 1, before the 1st line of text:

BACKGROUND OF THE INVENTION

Add the following paragraph to page 1, before the 26th line of text:

SUMMARY OF THE INVENTION

Add the following paragraph to page 4, before the 6th line of text:

BRIEF DESCRIPTION OF THE DRAWINGS

Add the following paragraph to page 4, before the 13th line of text:

DETAILED DESCRIPTION OF THE INVENTION

Amend the following paragraph starting on page 5, the 29th line of text and ending on page 6, the 5th line of text:

A second set of locator elements 46 are carried on an external rear face 50. Only 2 – 4 second locator elements 46 are needed to provide adequate angular location locking for the plug 12. If desired, however more elements 46 can be provided. The external rear face 50 can contact or come into close proximity to the face 32 of the socket 10 ~~plug 12~~ when inserted in the socket 10. The second set of locator elements 46 engages the first set of locator elements 30 seen in FIG. 2 and locks the plug 12 in a desired angular position relative to the socket 10.
